

DR. GARY J. PRICE

WHY DID YOU BECOME A PLASTIC SURGEON I enjoy the blend of artistic challenge, creativity, and scientific knowledge the field requires **FAVORITE PART OF YOUR JOB** Seeing my post-op patients **BEST ADVICE YOU'VE RECEIVED** Keep your eyes on the horizon **ALTERNATIVE OCCUPATION** Fly fishing guide **HOBBIES** Running and fishing **FRAMED PHOTOS ON YOUR DESK** My wife and children **RIGHT NOW I AM READING** In Search of Memory by Eric R. Kandel **I START EACH DAY** Looking at the sunrise over Long Island Sound **I'M NEVER WITHOUT** My sense of humor **I WOULD LOVE TO OWN** A 1963 blue Corvette

FACELIFTS...MORE OR LESS

Describing the classic facelift of a decade ago, Dr. Price uses the old adage, "When all you have is a hammer...everything looks like a nail." While a facelift is still a viable option for many patients, it is just one tool in a more refined toolbox. Today, insists Dr. Price, we must think of the totality of the face in layers if we are to accomplish **TRUE FACIAL REJUVENATION**. "Changes in texture, color and volume of the face cannot be changed by pulling and tightening. But by performing a myriad of treatments and procedures, you can be left with **A MORE NATURAL LOOK**, while addressing all the different components of facial aging." Dr. Price practices a layered, linear approach, including endoscopic brow lifts, minimal incision lifts, laser resurfacing, injectables and skincare. "We do an **ENDOSCOPIC BROWLIFT** technique with three incisions total. Facelifts with scars extending into the hairline are often not necessary today. Now, we can limit the scars to tiny incisions around the ear for many patients. **LASER RESURFACING** goes deeper into the layers of the skin while injectables and skincare do a great job of maintaining the desired look."

INSIDE INFORMATION

eye on the horizon

After 22 years as a practicing plastic surgeon, Dr. Gary Price has learned that providing the highest level of patient experience is directly related to controlling all the aspects of his solo practice.

"My philosophy is to integrate the most up-to-date, proven procedures to fulfill patient needs in as personalized and private an environment as possible." His office includes an operating room suite, recovery room, a tenured staff and the option of nearby overnight accommodations for those who value their privacy. Having "everything under one roof" guarantees his patients seamless service. With most consultations lasting 45 minutes to one hour, the emphasis is on "quality, not quantity." Patients can be assured they get the accessibility and attention they deserve. "I like to maintain an open, unhurried pace," says Dr. Price, who insists that each patient receive a second consultation prior to any surgery being performed.

His exclusively aesthetic practice offers a full menu of facial, breast, body and skin rejuvenation options. Frequently performed procedures include all aspects of facial rejuvenation and breast enhancement. In addition to his referral-based practice, Dr. Price has made a significant commitment to professional organizations and patient care. He is the immediate past president of the Connecticut State Medical Society, and was a major contributor to the state's recent accreditation laws for office surgery suites. Dr. Price also is on the clinical faculty of the Yale School of Medicine and he is a Physician Leader exploring better ways to deliver healthcare. "My profession allows me to not only seek ways to enhance my patients' lives but also to change the future face of medicine."

BOARD CERTIFICATION
